

NICIS ELECTRONIC TRADE PLATFORM

THE NIGERIA CUSTOMS SERVICE (NCS) HAS DEPLOYED A VIRTUAL SINGLE WINDOW FRAMEWORK, THE **NIGERIA INTEGRATED CUSTOMS INFORMATION SYSTEM (NICIS)** TO FACILITATE, SECURE AND ENHANCE THE MANAGEMENT OF TRADE. NICIS INTRODUCES STATE-OF-THE ART SERVICES FOR ELECTRONIC TRADE, FEATURING:

A **new trade platform** powered by the TradeWorldManager® (TWM®) software, interconnecting Nigeria Customs Service (NCS) with all stakeholders in a common business environment based on internationally recognized best practices

A **single portal** on NICIS for the submission of all trade documents

The seamless **interoperability** with 3rd party systems using most modern information data interchange, such as XML, web services...

A **global process** harmonizing and integrating all documents of the trade chain

Advanced security features that incorporate the use of biometrics (e.g. fingerprint), digital authentication and signatures in preparation for Internet-based paperless trade

Advanced **cross-agency risk management** and intelligence capabilities

A **collaborative environment** for Government agencies (e-Government) to share in real-time information for national security, national planning and the compilation of national statistics.

Centralized management of cargo clearance and logistics synchronization

Reinforced information controls enhancing data quality and integrity to improve trade monitoring and increase revenue collection

State of the art, **user friendly technological environment** supporting mobile services, bar code recognition, GPS-based geographical positioning, and the versatility for advanced integration
